

NEWS RELEASE

CDC Identifies Human West Nile Virus Infection

Vector Control Board

Anthony Gehrig
Dr. Matthew Eaton DDS
Dr. Joe Rinehart PhD

Ben Prather
Director

The US Centers for Disease Control and Prevention recently updated human case data in include one human case in Cass County:

https://www.cdc.gov/arbovet/Maps/ADB_Diseases_Map/index.html

Mosquito nuisance is near historic lows, recent weather conditions and historical prevalence of WNV suggest heightened awareness and caution.

Residents are encouraged to:

- reduce the amount outdoor activity during peak mosquito hours
- apply an appropriate mosquito repellent such as DEET
- dump and drain containers and yard items that collect water

Wide area evening adult control applications are not yet scheduled at this time; however these applications can be necessary as conditions warrant.

More information on mosquito control products and scheduled evening spraying are available at:
